

5 Things You Never Knew Your Cell Phone Could Do

March 18, 2010

This is for all the folks with cell phones. This should be printed and kept in your car, purse, and wallet. This is good information to have with you.

There are a few things that can be done in times of grave emergencies. Your mobile phone can actually be a life saver or an emergency tool for survival. Check out the things that you can do with it.

FIRST: Emergency.

The Emergency Number worldwide for mobile is 112. If you find yourself out of the coverage area of your mobile network and there is an Emergency, dial 112 and the mobile will search any existing network to establish the emergency number for you, and interestingly, this number 112 can be dialed even if the keypad is locked. Try it out.

SECOND: Have you locked your keys in the car?

Does your car have remote keyless entry? This may come in handy someday.

Here's a good reason to own a cell phone: If you lock your keys in the car and the spare keys are at home, call someone at home on their cell phone from your cell phone. Hold your cell phone about a foot from your car door and have the person at your home press the unlock button, holding it near the mobile phone on their end. Your car will unlock. This saves someone from having to drive your keys to you. Distance is no object. You could be hundreds of miles away, and if you can reach someone who has the other 'remote' for your car, you can unlock the doors (or the trunk).

Editor's Note: It works fine! We tried it out and it unlocked our car over a cell phone!

THIRD: Hidden Battery Power

Imagine your cell battery is very low. To activate *Reserve Power*, press the keys *3370# your cell phone will restart with this *Reserve Power* and the instrument will show a *50% increase* in battery capacity. This reserve will get charged when you charge your cell phone the next time.

FOURTH: Do you know how to disable a STOLEN mobile phone?

To check your Mobile phone's serial number, key in the following digits on your phone: *#06#. A 15-digit code will appear on the screen. This number is unique to your handset. Write it down and keep it somewhere safe. If your phone is stolen, you can phone your service provider and give them this code. They will then be able to block your handset so even if the thief changes the SIM card, your phone will be totally useless. You probably won't get your phone back, but at least you know that whoever stole it can't use/sell it either.

FIFTH: Free Directory Service for Cell Phones

Cell phone companies are charging us \$1.00 to \$1.75 or more for 411 information calls when there is no necessity to use this service. Most of us do not carry a telephone directory in our vehicle, so use this fix and don't pay the charges. Program this into your cell phone now.

When you need to use the 411 information option, simply dial: (800)FREE411 or (800)373-3411 without incurring any charge at all. This is the kind of information people don't mind receiving, so pass it on to your family and friends.
