Attention all Veterans

Information on Vietnam Naval Operations Compensation and Pension (C&P) Service has initiated a program to collect data on Vietnam naval operations for the purpose of providing regional offices with information to assist with development in Haas related disability claims based on herbicide exposure from Navy Veterans. To date, there has been verification from various sources showing that a number of offshore "blue water" naval vessels conducted operations on the inland "brown water" rivers and delta areas of Vietnam. Also, there has been identification of certain vessel types that operated primarily or exclusively on the inland waterways. The ships and dates of inland waterway service are listed below. If a Veteran's service aboard one of these ships can be confirmed through military records during the time frames specified, then exposure to herbicide agents can be presumed without further development.

All vessels of Inshore Fire Support [IFS] Division 93 during their entire Vietnam tour:

- ◆ USS Carronade (IFS 1)
- ◆ USS Clarion River (LSMR 409) [Landing Ship, Medium, Rocket]

VA Blue Water claims Update (Federal Update for July 12-16, 2010)

The United States Department of Veterans Affairs (USDVA) has added the below named ships to the already existing list for Navy and Coast Guard ships and vessels that are presumed to have been exposed to Agent Orange. If you serve on any of these mentioned ships and you have had a claim denied, you should reapply citing the VA list as the source for your reapplication. NAUS advises that the VA is already working on a third list that will have more ships listed. If you have a claim and evidence the ship you served on was in Vietnamese waters and/or actually tied up to a dock there, make sure you include that with your claim.
